

1. Download Android Studio

1. Go to the official Android Studio website:
[Download Android Studio](https://developer.android.com/studio)
2. Download the **Windows .exe installer**.
3. Accept the license agreement and start the download.

New features

2. Install Android Studio

Run the downloaded .exe.

During installation:

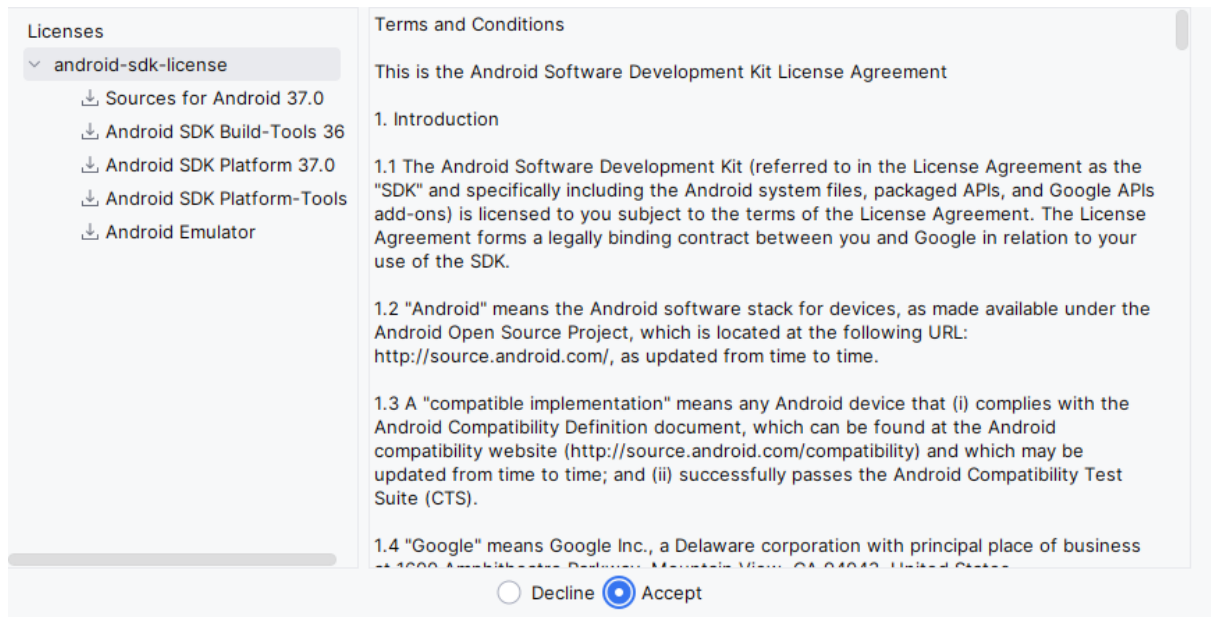

Components

Keep these selected:

- Android Studio
- Android SDK
- Android Virtual Device

Then:

Next → Install → Finish

3. Verify Android SDK

Open:

Android Studio → More Actions → SDK Manager

Check **SDK Platforms**.

For example:

- Android API 35/36 — depending on your project requirements
- Android SDK Platform
- Android SDK Build-Tools

Then go to:

SDK Tools

Make sure these are installed:

- Android SDK Build-Tools
- Android SDK Platform-Tools
- Android Emulator
- Android SDK Command-line Tools
- Android Emulator Hypervisor Driver / appropriate virtualization support

Click **Apply → OK**.
